Definitions:

LOCAL ASSOCIATION

Is defined as: A Minor Association registered & in good standing for a minimum of 3 consecutive years with Softball Alberta. Refer to Article I, (I.) of the 2021 Softball Alberta Handbook.

Where the Local Association resides will be determined by the specified city, town, village or hamlet identified in the registered mailing address of that association. The limit or boundary of that city, town village or hamlet will be used to determine the geographical distance from the player’s home address to their Local Association.

NOTE: The Local Association is *always* the closest geographic distance between the player’s home address and the city, town, village, or hamlet limits or boundary the Local Association resides in.

In the event of the following:

- A) The player resides approximately equal distance between 2 Local Associations,
- B) There is more than 1 Local Association within the city, town, village, or hamlet limits or boundary the player resides in.

The player who meets the criteria of A or B above may choose and must register with one of the Local Associations, at which time becomes that player’s Local Association for the current and following years until a Player Transfer is no longer required or the player relocates closer to another city, town, village or hamlet limit or boundary. If the 2 associations are located in different zones, the player must register with the Local Association within the zone of the player’s residence.

Once the Local Association opens registration for the season and a Player Transfer is submitted or a player release is anticipated, Softball Alberta recommends the collection of player fees be deferred by the Local Association until a final decision has been made.

TEAM

A team is a group of individuals working together to achieve a common goal. A group does not necessarily constitute a team. Teams normally have members with complementary skills and generate synergy through a coordinated effort which allows each member to maximize their strengths and minimize their weaknesses.
